### Manage your external contractors and freelancers with **Talent Networks**.

- Onboard external partners to your account, control project access and license usage for every individual.
- Augment your resource pool and optimize staffing decisions by considering all your resources – internal and external.
- Add roles, skills, calendars, cost rates and more for external members to ensure you plan the best available team for every project.
- Simplify timekeeping, utilization tracking and expenses from start to finish across your entire pool of resources.

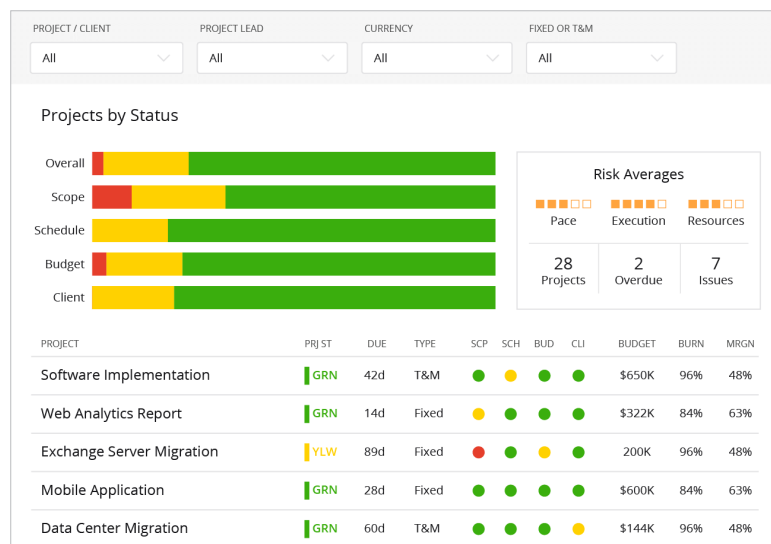

### Financial Management – Boost profitability, strengthen margins and enable informed financial decisions.

- Easy to navigate **Billing Module** that supports project-based accounting, time and materials, fixed-fee, retainer and other fee structures helps optimize billing and payments.
- Improve visibility into revenue, margins, costs, estimates with out-of-the-box **Insights Reports** designed for professional services organizations.
- Automated notifications alert managers when an invoice is due, late or paid; ensuring visibility and supporting timeliness and accuracy of invoicing.

### Project Management – Keep your projects on track and deliver bottom-line benefits.

- With all your information in one place, you gain total visibility into all of your projects to see the big picture—or drill down into the details.
- Robust project workspaces—with **TaskTracker**, activity feeds and automated **Notifications**—help teams focus on the most important tasks and easily collaborate.
- **Project Health Reports** and **Global Gantt Charts** make it easy to track project progress at the task or subtask level and adapt to changes.

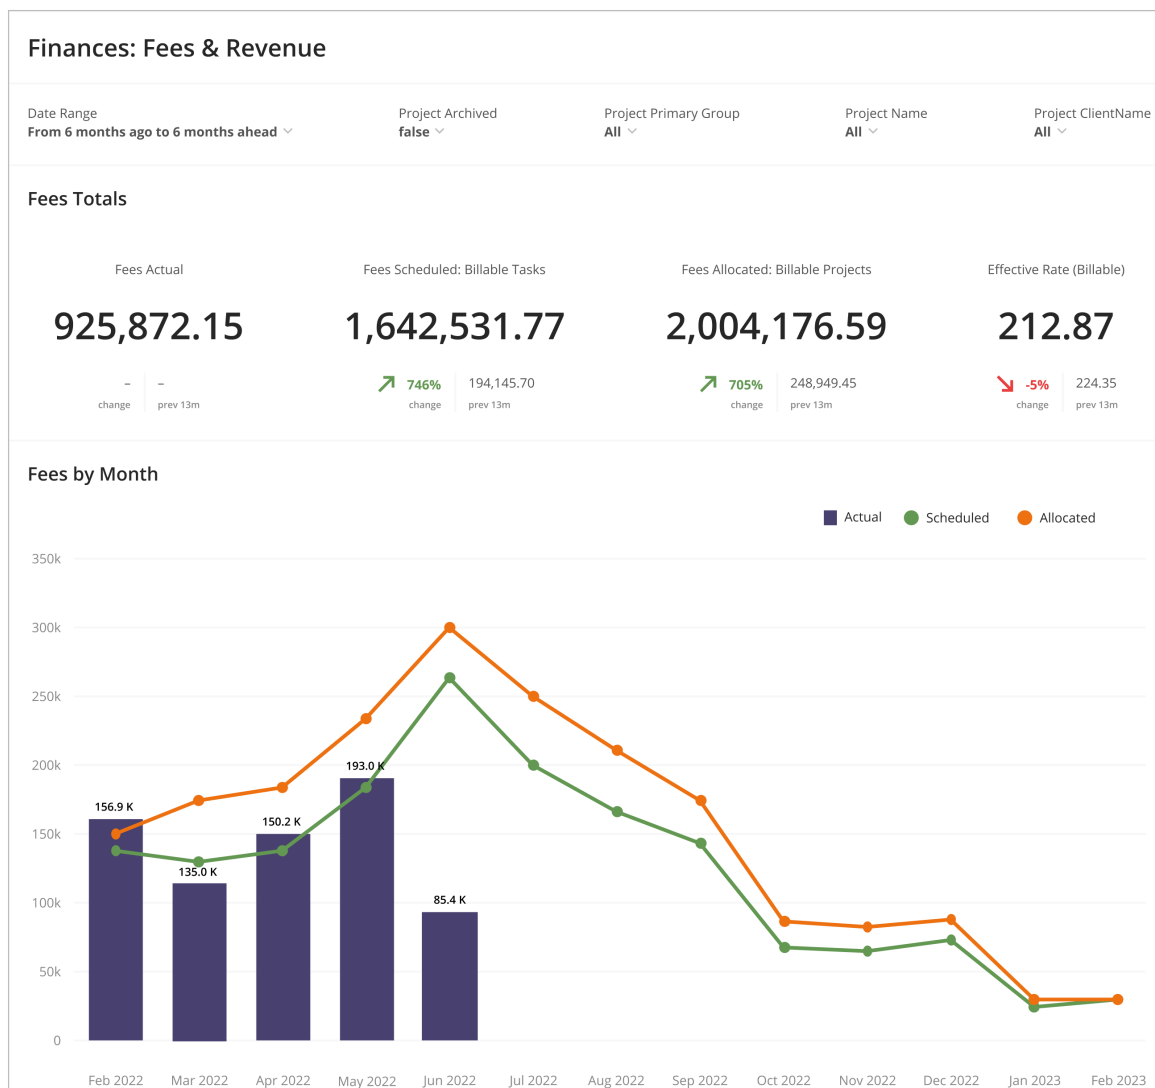

**Team Collaboration** – Connect people, resources and conversations across projects to improve outcomes.

- Project-level **Activity Feeds** and **Notifications** enable in-office and remote teams...and more.
- Collaborate securely with permission settings that ensure only the 'right' resources (internal or external) are able to see project details.

**Business Intelligence** – Bring together and visualize all your data to help you make informed decisions, quickly.

- With interactive reports and a powerful custom reporting engine, **Insights** gives you the visibility you need to make swift, informed decisions for projects and staffing.
- Accurately forecast, chart project health, and predict project outcomes with dynamic out-of-the-box or customizable reports.

## Integrations and Workflows –

Empower your teams by connecting existing systems and data to extend tech investments.

- Connect your financial and project data by turning on pre-built integrations with your ERP or project management systems like Netsuite, QuickBooks, Jira and more, or build your own integrations with API or flat file integration options.
- Import data from CSV files to update new custom fields across existing projects, tasks, users and objects with **Smart Upload Manager**.

Future-proof your operations with the leading provider of purpose-built professional services software solutions. Visit [Kantata.com](https://www.kantata.com) to learn more or schedule a demo today.
