Ready, Set, Good!
Secure, Compliant Cloud-Based PC's

Introducing Gx**Personal Compute**

RSM

GxPC offers Life Science companies cloud technologies that are secure, compliant and fast to deploy for contractors, travelers who frequent high-risk areas and staff who need flexible compute power for specific resource intensive tasks.

Speed
GxPC leverages Windows 365 PC's to deliver an unparalleled virtual computing experience for end users, with dynamic speed adjustment based on user resource needs and role.

Secure and Compliant
GxPC is configured from the ground up to deliver secure virtual PC's to end users that support your environment's regulatory policies, procedures and requirements.

Scalability
GxPC is able to rapidly scale with your growing business needs.

Always On
GxPC uptime is 99.9% and supported 24x7 in support of your business operations.

Connect from anywhere
GxPC is available from any device, anywhere around the globe. This enables remote workers to leverage their personal devices while the organization maintains a secure and compliant means of providing access to company data.

A cloud managed eco-system that understands Life Sciences

GxPC includes:

- Windows 365 for Contractors/Consultants
- Windows 365 for Risky Travelers
- Windows 365 for Lost Devices and other Ad-Hoc
- Windows 365 GPU for workload intensive tasks

Features and Benefits:

- Predictable and flexible spend
- Simple license driven models
- Reduced overhead managing excess physical devices
- Lightweight initial deployment
- Reduced TCO vs physical devices

GxPC understands your regulatory compliance needs:

GxPC is designed and configured to support 21 CFR Part 11, HIPAA and other regulatory needs out of the box:

- SSO with sign-on audit trail
- Cross-Region Business Continuity
- Data protection - screenshot protection, disk encryption
- One-way clipboard enablement
- Management through Intune
