

# GxPC: Secure personal compute in GxSuite

Ready. Set. Work anywhere.

## Secure, compliant cloud based PCs for life sciences teams

GxPC delivers cloud- managed virtual PCs designed to support regulated environments, flexible work models and evolving computing needs. Built on Windows 365, GxPC supports contractors, travelers and specialized workloads without expanding physical device footprints.

As part of GxSuite, GxPC extends secure access to data and systems wherever work happens.

## Compute designed for regulated environments

GxPC supports regulatory and security requirements out of the box, helping organizations manage access, protect data and maintain operational oversight on Day 1.

### What GxPC includes

- Windows 365 for contractors and consultants
- Windows 365 for high-risk travel scenarios
- Virtual PCs for lost devices and ad hoc needs
- GPU-enabled virtual PCs for compute-intensive workloads

### Built-in controls and flexibility

GxPC supports identity-based access, audit trails, disk encryption, clipboard controls and centralized management through Intune, allowing IT teams to manage environments without managing physical devices.

### Built-in controls and flexibility

- Predictable, license-driven cost models
  - Reduced overhead tied to physical hardware
  - Rapid deployment for short-term or specialized needs
  - Scalable compute aligned to role and workload
- 

## Equip your workforce for AI-driven productivity

Enable artificial intelligence at the edge by delivering secure, compliant end-user environments ready for AI copilots and intelligent productivity tools.

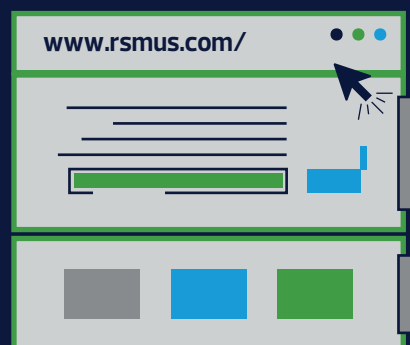

Protect sensitive data in AI workflows with managed security controls that safeguard information accessed or generated by AI-powered tools.

## Part of the GxSuite ecosystem

GxPC enables secure access, performance and collaboration in concert with GxNET, LabNET, GxShare and GxCloud, bringing together infrastructure, networking, collaboration and compute into RSM's leading, unified life sciences platform, GxSuite. The suite supports faster time to market for new therapies, reduces operational costs through centralized management, and enables new revenue opportunities through innovation and efficient scaling across the enterprise.

## Why RSM?

RSM combines deep life sciences industry knowledge with technical experience to help organizations design and operate secure, scalable digital environments. Our teams understand regulated data, complex research workflows and the realities of scientific collaboration, bringing a practical, governance-focused approach that aligns technology to your business and research goals.
